biometric identification

Since 1986 your reliable partner in international governmental and industrial security projects:

The founder Manfred Fink performed already several hundred consulting projects in many different industrial sectors and for various authorities almost around the globe.

Our strength is the holistic approach basing on analytic strategies and with our network of experts in specific fields we are able to determine and to meet the customer's security needs.

The result is an independent 360 degree focus onto all aspects of organizational, human, physical, technical and digital security, as well as absolutely convinced and satisfied customers.

Contract us now for more information and your security problem will be a thing of the past.

We support you with following services:

- Individual threat- and risk analysis
- Comprehensive security audits
- Integrated security concepts
- Concepts for information- and communication protection
- Crises management and business contingency plans
- Work instructions for all major security processes
- Planning organizational security measures
- Planning of human guarding
- Product scouting for technical security solutions
- Planning of physical and electronic security equipment
- Tendering in security concerns
- Supervision of implementation of security technologies
- Travel security consulting
- Customized security awareness trainings
